Ammara Badat

Junior Full Stack Developer

Gauteng, South Africa | +27 60 621 3987 | badat.ammarax@gmail.com
Portfolio: ammara-badat-portfolio-next.vercel.app | GitHub: github.com/ammara-tech

PROFILE

Junior full stack developer who builds complete web applications, from responsive interfaces in React and Next.js to secure back ends with SQL and Supabase. Certified in HTML and CSS, HTML5 Application Development, JavaScript and Software Development (Certiport IT Specialist). Available immediately for junior full stack or front-end roles in Gauteng, hybrid or on-site.

TECHNICAL SKILLS

Front end	HTML, CSS, JavaScript (ES modules), TypeScript, React, Next.js (App Router), Tailwind CSS, responsive design, Progressive Web Apps
Back end & data	SQL, PostgreSQL, Supabase (Auth, Row Level Security, Storage), REST APIs, server-side validation
Tools & practice	Git and GitHub, Vercel, VS Code, accessibility (WCAG AA contrast, keyboard navigation), SEO basics, technical writing

PROJECTS

Family Clinic Platform (capstone) — Live · Code · Case study
Next.js, TypeScript, Supabase (Auth, RLS, Storage), Tailwind CSS, Vercel

- Built a secure clinic system with separate sign-ins and dashboards for the owner, front desk, doctors, pharmacy and patients.
- Enforced access in the database with row-level security and trusted roles, so each role only sees the records it is allowed to.
- Delivered a patient portal with online booking and private document uploads, and owner charts for practice growth and no-shows.

Developer Portfolio — Live · Code
Next.js, TypeScript, Supabase, Tailwind CSS

- Stores projects in Supabase with an owner-only admin page for adding, editing and deleting entries.
- Contact form with owner-only reading, a honeypot field and a database rate limit; tested for WCAG AA contrast and keyboard access.

Neon Arcade — Live · Code
JavaScript, HTML, CSS, Canvas, PWA

- Retro browser arcade with 10 games, a shared ticket and trophy system and a daily challenge; installs and works offline.

F1 Race Hub — Live · Code
JavaScript, HTML, CSS, REST API

- Formula 1 dashboard using live data for drivers, teams, races and circuits, with favourites and driver comparisons.

MyFlix — Live · Code
JavaScript, HTML, CSS, public APIs, PWA

- Movie and TV browsing app with search, favourites, genres and a movie guessing game.

CERTIFICATIONS
